Multiple sclerosis (MS) is a condition of the central nervous system. More than 100,000 people in the UK have MS. Symptoms usually start in your 20s and 30s and it affects almost three times as many women as men. Once diagnosed, MS stays with you for life, and although there is currently no cure, research is progressing fast.          As on previous occasions, pupils who pay £1 (or more) can wear casual clothes to school on the last day of term.</p>	<p><b>Mr Caldwell</b></p>
